

## ***EDITS***

EDI Translation Service  
(EDITS) improves business  
knowledge through EDI  
integration

***EDI Translation Service (EDITS), simplifies and accelerates your B2B communications. The EDITS technology enhances integration, data translation and customer service. By communicating with trading partners electronically, EDI eliminates human error and increases productivity. With EDITS you will have the ability to focus on your business while we take responsibility for your EDI.***

- System integration methods used with EDITS allow the customer to choose the best method for the business. Whether it is a sophisticated database queueing technology, XML, flat file integration, etc., EDITS can be integrated with your ERP systems and support the most complex supply chain configurations.
- With EDITS you will have the applications, EDI tools, helpdesk expertise and business methodology to give you the most for your time and money.
- We provide customer service using knowledgeable EDI experts. In environments where distributors, service centers, warehouses and OEMs are both suppliers and customers, you need an EDI group that is familiar with EDI translation, partner configuration and communications, mappings and managing the EDI data flow.
- We offer low cost and high value added EDI processed in real time making it easier to communicate with your customers and suppliers.
